

ELECTRIC WATER BOILER INSTRUCTIONS

This Water Boiler is perfect for any event, party, function or occasion.

SAFETY:

- This Water Boiler will become hot whilst in use, therefore, suitable precautions must be taken to avoid accidental burns.
- The unit should be positioned to minimise the possibility of accidental touching.
- This Boiler is fitted with a 13amp plug and must be plugged, either, directly into the mains or on an extension with only one appliance on a 13amp extension cable.
- Do not lift or move the boiler with water in it at any time.
- Do not let the unit to boil dry.

SETTING UP:

To start using this water boiler please follow the instructions below:

- Plug the boiler into a mains supply. Make sure the rocker switch is in the 'off' position. '0' is off.
- Fill the boiler with water to the Max level (marked inside of the tank). Replace the lid.
- Turn the boiler on, positioning the rocker switch to 'I' position.
- The Red light will illuminate, to show the boiler is heating up, this will stay on until the boiler has reached boiling, once its reached temperature the green light will show its now keeping warm.
- Dispense the hot water as required from the tap at the front of the unit.

Please note that this is the basic principle of using our electric water boilers. Some of our models have a temperature thermostat dial, this will need to be turned to set the required temperature.

30 litre Water Boiler will make approximately 120 cups of tea/coffee.

PACKING DOWN:

When you have finished with the Water Boiler, please follow the instructions below:

- Switch off the Water Boiler and unplug from the mains supply.
- Allow the unit to cool down before moving or touching it.
- Do not attempt to move the boiler or empty it until it is cool.

Please note this Water Boiler is included in our 'Free Return Dirty' Service, however, we do expect that all water has been emptied and a wipe over of any spillages.
